可利用範圍	包含撓性多孔洞基材以及施加於該基材表面之骨水泥材料的骨折內固定物件。		
摘要	<p>本發明提供一種具有多孔洞結構之骨折內固定物件，其包含一撓性多孔洞基材以及一覆於該撓性多孔洞基材表面之骨水泥材料，其中該撓性多孔洞基材實質上由生物可降解材料構成。</p> <p>A bone fracture internal fixation article with a porous structure is provided. The article comprises a flexible porous substrate and a bone cement material applied the surface of the flexible porous substrate, wherein the flexible porous substrate substantially consists of a biodegradable material.</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div>
